THERE'S ONLY ONE NEW
“NORMAL”

**IN THE POST-PANDEMIC OFFICE WORLD...
FLEXIBLE, ADAPTABLE, MODULAR SPACES**

Dramatic Changes in Office Interiors

The definition of “the workplace” has changed and continues to change dramatically. With firms still working through which models best meet their business goals (fully in-office, hybrid, purely remote), every aspect of the workplace is being reimagined – especially the office itself.

What It Means

Modular solutions are the preferred method for satisfying the ever-evolving work environment. Solutions that can be reconfigured, expanded, and relocated beat traditional stick-built construction every time.

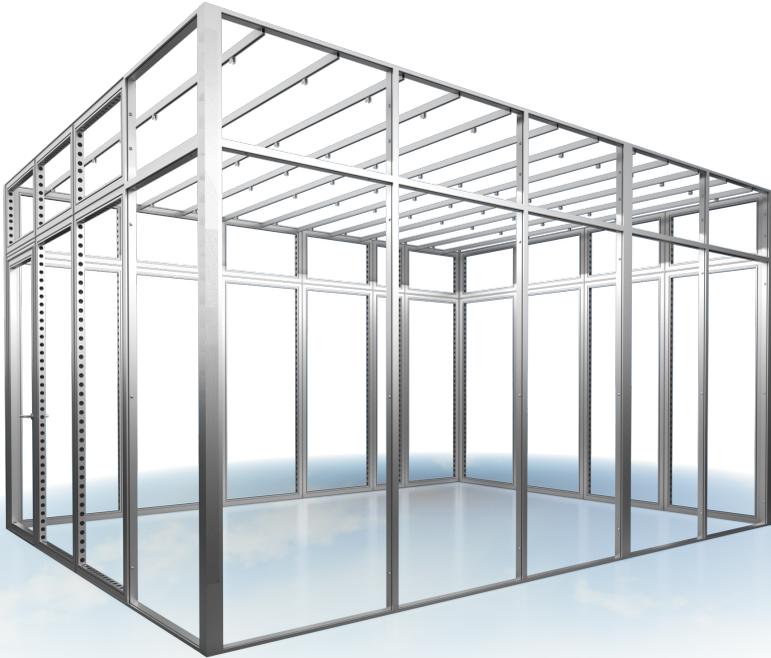

The Solution

For those charged with designing flexible, adaptable office spaces and interiors, Agam is the next-generation manufacturing partner that builds prefabricated customized office environments fast, through its unique combination of solutions, capabilities, and craftsmanship.

PREFABRICATED VS. TRADITIONAL

With prefabricated, modular structures, reconfigurations, add-ons and relocations are no problem. Instead of demoing and dumping drywall and studs into a dumpster, you can easily make the changes you need, with limited disruption to your space.

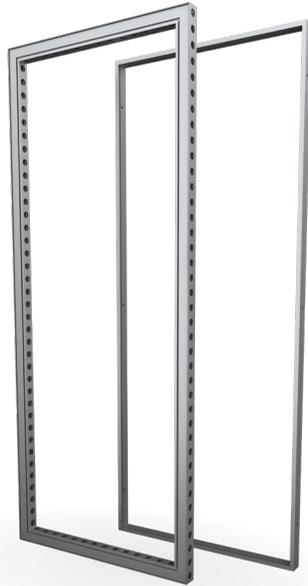

Benefits of Prefabrication

- More predictable costs with fixed pricing
- Speedier turnaround times
- Faster and cleaner install = earlier occupancy
- Less disruption to the on-going business
- Easy trade tie-ins with modular wiring and lighting
- Accelerated depreciation
- Structures are assets that can be relocated and repurposed
- Less waste

Services Include

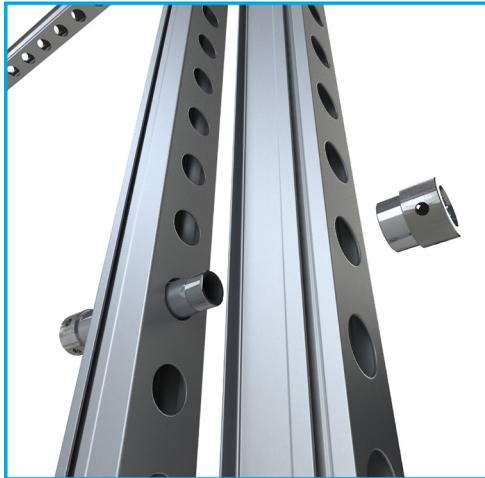

- Engineering
- Acoustic attenuation
- Modular wiring, lighting and technology integration
- Graphics and signage
- Set-up drawings
- Installation oversight
- Warehousing

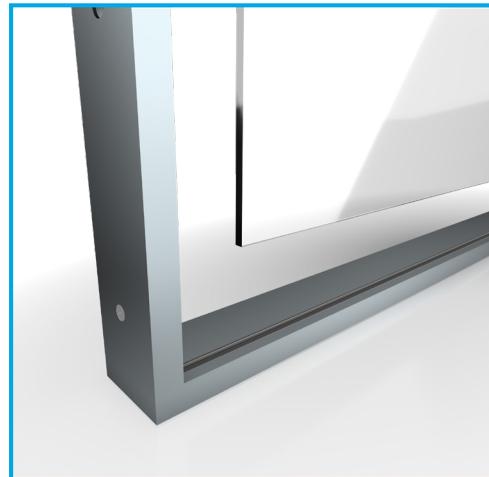

How It Works

- Pre-assembled frames with facias on one side are attached together to form the overall structure
- Modular wiring and lighting is installed
- Interior facias are applied
- Ceiling is installed (where applicable)
- After one live electrical hook-up, the structure is ready

Easy to use frame connectors.

Frame can accommodate solid or glass panels.

BENEFITS OF WORKING WITH AGAM

Unlimited Design Possibilities

Unlimited design possibilities that come from a combination of modular systems and flexible solutions that are fully customizable to ensure your design intent is never compromised.

Quick Turnaround

Speed that comes from a culture built to solve problems fast and a breadth of manufacturing capabilities that greatly reduces the time needed to build and install what you imagine.

Quality Craftsmanship

Quality craftsmanship that spans 40 years of precision, in-house engineering with flawless execution.

Headquartered and manufactured in the USA, Agam is one of the largest producers of prefabricated, modular structures in the US. With over 130 proprietary extrusions, our Nexus tool-free wall system, and the best equipped plant in the industry, we can realize practically any design. Off-the-shelf or custom, our turnaround times are unmatched. With our 115,000 square foot facility, we have plenty of space for manufacturing, staging and storage.
